The territorial veterinariants have been making bacterial counts of the city milk supply for the last six months or more, but the members of the board have hesitated to make public the results of these tests.

Many lots of milk have proved inexpressibly fifthy. The veterizarians have endeavored to secure betterment of the conditions under which many dairy herds and individual "family cows are maintained, but without much success.

cows are maintained, but without muce success.

The board of agriculture is now of the opinion that it will be impossible to enforce sanitary handling of cow and milk unless public opinion aroused. The only way to do this to let the public know what dairyme exercise ordinary sanitary precaution in handling the milk which they see and what dairymen are absolutely us regardful of the rights of their customers in this regard.

Pilthy Stables Make Poor Milk

Milk from pedigreed cows may be a handled in the stables and milk room that it is absolutely poisonous as hums food by the time it reaches the consumer.

Milk from a healthy animal is pure as any food can be when it first drawn from the cow. But if a milker's hands sud clothing are dire or the animal's skin is caked with du

the stand that the public are entitled to what they pay for. The only way to compel those dairymen who are careless of sanitary methods in milk handling to amend their ways is to let the public know which are selling clean milk and which unclean. These hacterial counts, when published, will prove an exact index of the care and degree of cleaniness employed by the different dairymen.

The routine reports of the various discoverage in the present published a pointed protest recently. A censorship is a wally new experience for English newsystems. They have quickly adjust the newsettands of the London hotels, and offered on Fleet street by the newsboys. This has made the London papers chafe under what some of them consider the unnecessary rigors of their cenerals.

The board granted permission to Dr. W. T. Bingham for one of the employes of the Bishop Museum to collect scientific specimens on government forest reserves. This request, which is a recognition of the legal coutrol which the board exercises over much of the public lands throughout Hawaii, brought out caustic criticism of the high kanded manner in which various members of

## A. F. Gilman and Miss Adene Winter

Youthful Bridegroom Wins Parenness and Takes Bride To Family Home

More than the usual measure of re-mance entered into the wedding of Arthur Poster Gilman and Miss Addens Winter, which took place Tues-day afternoon in Waisiba, this Island. The coremony was a quiet and private one, Waisiba being chosen by the young people because of its quietness and soli-

hent before a license would insue.

Shortly after this Gilman and Miss Winter are said to have disappeared and it is said that an automobile driven at a fair clip, with little Dan Cupid atting on the radiator atom, was seen on the way to Wajalaa, where the necessary marriage permit was finally actived and all pithis ceased. After the wedding ceremony the young couple spent the night in the Haletwa Hotel, returning to the city-yesterday moraing.

Hotel, returning to the city yesterday morning.

On the return of Mr. and Mrs. Gilmun to Honoluju the couple immediately made overturns to settle in a little senide cottage in Walkiki and the deal is said to have been all but closed when Gilman, pere, forgiving and forgiven, invited the newly wests to make their home under the parental roof.

Mr. and Mrs. Arthur Foster Gilman are now residing in the home of Mr. and Mrs. Joseph A. Gilman, corner of Wilder avenue and Pikol street.

### Muzzle Put on London Editors With Reference to Audacious Not Appreciated

LONDON, December 16.—(Corre position of The Associated Press)— The British press consorate has not yet permitted the British newspapers to

censorship.

The Daily News and Leader, one of the strongest party organs of the present government published a pointed protest recently. A censorship is a wholly new experience for English newspapers. They have quickly adjusted themselves to the possibilities of defying it in the spirit while observing it in the letter. The Daily News and Leader did not mention the Audacions, but it said, and everyone understood its meaning:

but it said, and everyone understood its meaning:

"Rumors of an event of very great importance to the British public have been circulating for a very long time past now in this country. Very full accounts of the event in question have now been published in the Swedish, the Dutch, the American and finally the German papers. There is scarcely an important public in the world, that is to say, which has not now received a full report of the alleged occurrence, except that one which is most directly affected by it.

### Big Liner Reopens Canadian-Australasian Service, Suspended On Account of War

It was like old times on the waterfront yesterday when the Canadian Australasian liner Niagara atsamed up to her dock the first ship of the line

to call here since September 10. The arrival of the Niagara means the resumption of regular service between Honolulu, Vancouver and Sydney, for hereafter, it is stated, all the liners of the Cauadian-Australasian service

Promotion Means 'Doing Things'

The speaker thought that an erron consider had drifted out into a perton of the community to the effect that promotion quasisted of a man behind a deak and a big pile of literature which he was mailing to all parts or the world.

As a matter of fact, promotion is a synonym for "ising things."

The promotion committee had heretofore been "doing things."

The promotion committee had heretofore been "doing things." that did not make much of a showing on the surface, but they were effective all the same. The promotion gommittee work had not, however, covered the whole field. It had brought the tourist here from all over the world, and then had left him to his own devices.

It was as though a merchant put a page ad in the Star-Bulletin describing what he had to sell, and when the customer arrived to buy, the merchant had stuck his heels up on the counter, takon to reading the newspaper; and leaving the customer to look out for himself, instead of trying to self him goods.
